DETAILED ACTION

Drawings

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the “envelope surface region” (Claims 1 and 10) must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as “amended.” If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either “Replacement Sheet” or “New Sheet” pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it

Art Unit: 3726

pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 1-25 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. In claims 1 and 10, "envelope surface region" is not described in the specification.

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 1-25 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

1) A broad range or limitation together with a narrow range or limitation that falls within the broad range or limitation (in the same claim) is considered indefinite, since the resulting claim does not clearly set forth the metes and bounds of the patent protection desired. See MPEP § 2173.05(c). Note the explanation given by the Board of Patent Appeals and Interferences in *Ex parte Wu*, 10 USPQ2d 2031, 2033 (Bd. Pat. App. & Inter. 1989), as to where broad language is followed by "such as" and then narrow language. The Board stated that this can render a claim indefinite by raising a question or doubt as to whether the feature introduced by such language is (a) merely exemplary of the remainder of the claim, and therefore not required, or (b) a required feature of the claims. Note also, for example, the decisions of *Ex parte Steigewald*, 131 USPQ 74 (Bd. App. 1961); *Ex parte Hall*, 83 USPQ 38 (Bd. App. 1948); and *Ex parte Hasche*,

86 USPQ 481 (Bd. App. 1949). In the present instance : claim 1, line 2 recites the broad recitation “functional element”, and the claim also recites “fastener element” which is the narrower statement of the range/limitation. ; claim 10, line 2 recites the broad recitation “functional element”, and the claim also recites “fastener element” which is the narrower statement of the range/limitation: and claim 17, line 4 recites the broad recitation “features”, and the claim also recites “groove-like and/or rib-like features”” which is the narrower statement of the range/limitation.

- 2) Claim 1, line 14, “the formation” lacks antecedent basis.
- 3) Claim 2, line 3, “the transition” lacks antecedent basis.
- 4) Claim 2, line 3, “the wall section’ lacks antecedent basis.
- 5) Claim 2, line 5, “the radially outer side” lacks antecedent basis.
- 6) Claim 3, line 3, “the transition” lacks antecedent basis.
- 7) Claim 4, line 4, “the intermediary” lacks antecedent basis.
- 8) Claim 5, line 3, “the freeing” lacks antecedent basis.
- 9) Claim 5, line 4, “the pressure” lacks antecedent basis.
- 10) Claim 5, line 4, “the plunger” lacks antecedent basis.
- 11) Claim 6, line 4, “the component assembly” lacks antecedent basis.
- 12) Claim 6, line 5, “the abutment element” lacks antecedent basis.
- 13) Claim 12, line 4, “the recess” lacks antecedent basis.
- 14) Claim 13, line 4, “the transition” lacks antecedent basis.
- 15) Claim 14, line 4, “the transition” lacks antecedent basis.
- 16) Claim 17, line 2, “the starting” lacks antecedent basis.

17) Claim 17, line 5, "the closed state" lacks antecedent basis.

18) Claim 17, line 6, "the connection" lacks antecedent basis.

19) Claim 23, line 3, "the free end face" lacks antecedent basis.

20) Claim 23, line 5, "the intermediary" lacks antecedent basis.

21) Claim 24, line 2, "the end faces" lacks antecedent basis.
